

SHIPPING WITHOUT THE DRAMA

IN GOD WE TRUST

AN AMERICAN TRADITION IN TRANSPORTATION

The Syfan name has long been respected for trusted, reliable over-the-road shipping. With over four decades of experience under our belt, Syfan Logistics and asset-based Syfan Transport provide a diverse array of shipping services. We are a growing company with more than 250 professional team members and services stretching throughout the continental United States, Mexico and Canada.

DEADLINE SHIPPING WITHOUT THE DRAMA

We do NOT rely on third-party call centers to communicate with our customers. Syfan is a 24/7 operation with our own full-time dispatch team, which allows us to command the greatest control over on-time shipments – with none of the drama.

————— IN GOD WE TRUST —————

EXPERTISE IN FOODSTUFFS DELIVERY

We haul it all. But with our roots in Georgia's poultry industry, Syfan is particularly well-versed in the deadline requirements of shipping meats and other perishables for some of the nation's largest food companies in:

Poultry | Seafood | Confectionery | Cereal | Soft drink

In addition to food and beverage, Syfan hauls for a wide range of industries nationwide:

Parcel shipping | Automotive | Construction materials | Electronics
Healthcare | Food and beverage Manufacturing | Paper products
Retail/consumer products

PRIMARY CARGO INSURANCE

We back every load with primary cargo insurance—another stress reliever for our customers. We also provide excess liability policies for the most valuable loads such as computers and pharmaceuticals.

Very few companies in our industry go this extra mile like Syfan to assure the highest level of insurance protection for our customers' loads.

KEY SERVICES

With a 100% commitment to on-time pick-up and delivery – and full transparency and communications along the way – Syfan delivers a seamless slate of key services focused on the customer.

SYFAN LOGISTICS Our logistics division draws from an expansive network of carrier partners to further bolster our capacity for Full Truckload and LTL shipments. In fact, Syfan Logistics is recognized as one of the leading logistics companies in the United States by Inbound Logistics, Transport Topics and other national publications in their annual rankings. More importantly, our own customers have honored us with award recognition for exemplary service.

FREIGHT MANAGEMENT We also can oversee a company’s entire truck freight program through our Freight Management division for significant cost savings and greater operational efficiencies.

SYFAN TRANSPORT Our asset-based carrier arm, Syfan Transport, provides customers with access to our ever-expanding private fleet of over-the-road trucks. In addition, we own several hundred trailers – dry vans, flatbeds, and the industry’s most advanced temperature-controlled refrigerated trailers with cold-chain monitoring and solar panels.

SYFAN EXPEDITED Our Expedited division specializes in shipping just-in-time inventory and the most time-sensitive loads. When others say, “it’s impossible,” our Expedited team draws on vast experience in the deadline-oriented foodstuff industry to say “yes” to the most difficult challenges.

SYFAN SERVICES FOR SHIPPERS

Freight Management

Full Truckload | LTL

Expedited | Power Only

Yard Management Support

Project Management

SYFAN POWER ONLY There is much greater shipper demand these days for efficiency with drop and hook shipments. Our power-only single drivers and teams excel in easing sudden spikes in your shipping volume or filling in for company drivers who may be out of hours under ELD rules.

YARD MANAGEMENT SUPPORT For warehouse and storage operations, our independent Yard Management Support division – Turbo Sales & Leasing – provides sales and leasing of terminal tractors. With its vast on-site inventory, Turbo is the nation's largest authorized TICO terminal tractor dealership and an official Cummins facility for warranty work and repair.

PROJECT MANAGEMENT No job is too big or small for our specialized Syfan Project Teams with 24/7 dispatch and Pop-Up fleets at the ready. We research and analyze options, then respond quickly and decisively, making sure your projects stay on track with customized planning and consistent reporting.

Syfan technology delivers the highest level of transparency, communications and reliability for our shipper customers – with service so seamless that we may as well be invisible.

CUSTOMIZED TECHNOLOGY AND AROUND-THE-CLOCK COMMUNICATIONS

While personal customer relationships will always be the heart of our business, we use technology to enhance our service.

Syfan provides each customer with a private website portal and designated professional team with the knowledge of your business and specific logistic requirements. We keep you posted on your loads every step of the way with the most advanced communications possible through our special technology partnership with McLeod Software systems. Furthermore, our operations run 24/7 with our own in-house dispatch team – so we're always on the job for you.

**A Company with Core Values
Grounded in Faith**

IN GOD WE TRUST

- 24/7 load tracking and monitoring
- Customized customer portals
- A longtime partnership with McLeod software
- API and EDI electronic data interchange
- State-of-the-art infrastructure, stability and reliability
- Sophisticated technology system that eliminates lengthy load-board searches
- Automated Telephone Management System directing calls to your personal Syfan team representative.

We Work to be the Service Leader in the Transportation Industry
by Honoring God in Our Daily Actions.
