

SYFAN LOGISTICS

— IN GOD WE TRUST —

**WE SHIP LOADS
OF CONFIDENCE**

The Syfan name has long been respected for trusted, reliable over-the-road shipping. With over four decades of experience under our belt, Syfan Logistics provides a diverse array of shipping services. We are an ever-growing third-party logistics provider with more than 450 professional team members and services stretching throughout the continental United States, Mexico, and Canada. Consistently a National Top 100 3PL Provider, we strive to better serve our customers and carrier partners by “never saying no” and always working to find a solution—no matter the problem.

*Jim, Steve & Greg Syfan
Generational family-owned, creating high standards in the transportation industry.*

DEADLINE SHIPPING WITHOUT THE DRAMA

We do NOT rely on third-party call centers to communicate with our customers. Syfan is a 24/7 operation with our own full-time dispatch team, which allows us to command the greatest control over on-time shipments – with none of the drama.

THEN

HISTORY OF TRANSPORTATION INNOVATION

Since launching our freight brokerage almost 40 years ago, our team has always been on the hunt for new ideas and technologies to better serve our customers and carrier partners. Our company has always understood the value of staying lockstep with cutting-edge technologies—and this continues today.

1984:

Our first office was located in a trailer beside a busy railroad track. In these days, our team used a load board ledger designed by Jim Syfan to monitor loads and track shipments. This ledger would be a precursor to the modern-day interactive load boards used across the 3PL world.

1986:

Syfan's relationship with McLeod Software, the national leader in freight brokerage technology systems, begins as both companies are in their infancy. Throughout our 38-year relationship, Syfan has served as a beta testing site for McLeod's most innovative software developments.

2013:

2013: Syfan Logistics adds GPS routing devices to all trucks in its growing fleet. Syfan also introduces FMS, Freight Management Services, to help shippers lower rates with optimized loads and efficient bid procurement.

NOW 2024

Today:

In 2024, Syfan utilizes a multitude of modern technologies to better service our customers and partners. From the use of sophisticated operations room computers and operating systems, to our continued partnership with McLeod and other software companies such as FourKites, Syfan Logistics remains committed to adopting innovative technology. Our commitment extends to empowering our team members to reach their highest potential through leading-edge training, tools and knowledge. Because when we promise, we deliver.

EXPERTISE IN FOOD COMMODITIES DELIVERY

We haul it all. But with our roots in Georgia’s poultry industry, Syfan is particularly well-versed in the deadline requirements of shipping meats and other perishables for some of the nation’s largest food companies.

**POULTRY | SEAFOOD | CONFECTIONERY CEREAL
SOFT DRINK | DAIRY | PORK | BEEF | ICE CREAM ★**

In addition to food and beverage, Syfan’s 3PL services extend to a wide range of industries across North America.

**PARCEL SHIPPING | AUTOMOTIVE
CONSTRUCTION MATERIALS | ELECTRONICS
HEALTHCARE | FOOD AND BEVERAGE
MANUFACTURING | PAPER PRODUCTS
RETAIL/CONSUMER PRODUCTS ★**

PRIMARY CARGO INSURANCE

We back every load with primary cargo insurance—another stress reliever for our customers. We also provide excess liability policies for the most valuable loads such as computers and pharmaceuticals.

Very few companies in our industry go this extra mile like Syfan to assure the highest level of insurance protection for our customers’ loads.

Syfan technology delivers the highest level of transparency, communications and reliability for our shipper customers – with service so seamless that we may as well be invisible.★

CUSTOMIZED TECHNOLOGY AND AROUND-THE-CLOCK COMMUNICATIONS

While personal customer relationships will always be the heart of our business, we use technology to enhance our service.

Syfan provides each customer with a private website portal and designated professional team with the knowledge of your business and specific logistic requirements. We keep you posted on your loads every step of the way with the most advanced communications possible through our special technology partnership with McLeod Software systems. Syfan has been partnered with McLeod for over 38 years and we are the technology company's longest tenured customer. This partnership has provided us with unique opportunities to be on the frontlines of testing new technology to better serve our customers and carriers.

Furthermore, accessibility remains paramount for us. 24/7 accessibility gives our customers the freedom to call day or night and know they are reaching a real team member of their own team dedicated to their specific account. When you call Syfan, you are guaranteed to talk to account-specific representation.

- 24/7 load tracking and monitoring
- Customized customer portals
- 38+ year relationship with McLeod Software
- API and EDI electronic data interchange
- Dedicated support teams for every account
- State-of-the-art infrastructure, stability and reliability
- Sophisticated technology system that eliminates lengthy load-board searches
- Automated Telephone Management System directing calls to your personal Syfan team representative.

SUSTAINABILITY

ETHICAL SOLUTIONS to reduce our carbon footprint. Achieved through corporate partnerships and company-wide initiatives, Syfan Logistics is focused on a sustainable future for the transportation industry.

To achieve our goal of building a more sustainable supply chain, Syfan Logistics has developed the following solutions:

- More energy efficient tactics implemented during our expansion.
 - Use of recycled material
 - Switch to LED lightbulbs to further contribute to energy conservation
- Recycling of electronics
- One-way oil recycling program in our truck shop
- Metal recycling (steel and aluminum)
- Route optimization
- Ensuring efficient routes for our carrier partners
- Reduction of physical paperwork through the adoption of digital contract services, digital customer portals, and electronic signatures for invoices.
- Elimination of empty miles for our Syfan Transport fleet and our carrier partners on every delivery. The miles we travel (and emissions we produce) have been reduced by utilizing more efficient tracking and routing methods.

Transition to a fleet of electric trucks to reduce harmful emissions and pollution. With the goal of having a fully electric fleet by the year 2035, we have already ordered two **Tesla Electric Trucks**. These Tesla trucks will be known as the gold standard of efficiency once they hit the road—a gradual replacement of our entire fleet will begin with these first two electric haulers.

- Ability to scale up at a moment's notice.
- No amount of volume is too big.
- Ability to assign and build dedicated support teams.
- Access to thousands of everyday drivers within our network.
- Performance that delivers.
